FASHION FORWARD

Water use in the textile industry of the SUDOE area

(Spain, Portugal and France)

interreg-sudoe.eu

[fashionforward.sudoe](#)

The textile industry is highly water-intensive, from the cultivation of natural fibers to the finishing of garments. The SUDOE area (comprising Spain, Portugal, and southern France) faces critical challenges due to increasing water scarcity and environmental pressure. Therefore, Fashion Forward proposes a set of solutions for the sector.

Internal recirculation and reuse of treated water

Process optimization and efficient chemical dosing

Innovative technologies for sustainable dyeing and dry finishing

Consumption diagnosis and monitoring

Advanced regeneration technologies

Continuous staff training
